ARE AS FOLLOWS**

7.1.5 - GREEN CAMPUS INITIATIVES INCLUDE

7.1.5.1 - THE INSTITUTIONAL INITIATIVES FOR GREENING THE CAMPUS ARE AS FOLLOWS

Use of Bicycles:

Landscaping with trees and plants

Landscaping trees provide shade in outdoor spaces, reducing heat and creates a comfortable environment for our students and staff. Green landscaping enhances the beauty of the campus, making it more attractive and inviting. Tree-covered areas are used as discussion zones, or recreational spaces. Trees help absorb pollutants and increase oxygen levels, creating a healthier atmosphere. In our campus trees attract birds, butterflies, and other beneficial organisms, promoting ecological balance. A greener campus contributes to sustainability by reducing carbon footprint and promoting eco-friendly practices. Trees help in cooling our college campus by reducing the urban heat island effect. Also Green spaces encourage students to engage in outdoor activities, sports, and social interactions. By incorporating green landscaping and tree plantations, our college created a sustainable, eco-friendly, and aesthetically pleasing campus environment while promoting environmental awareness among students.

Pedestrian Friendly pathways

Ramps play a crucial role in ensuring accessibility and inclusivity on a college campus. They provide a safe and convenient means of movement for students, staff, and visitors. The Ramps in our college enable wheelchair users, people with mobility impairments, and those with temporary injuries to move around the campus easily. Many regulations require educational institutions to have ramps to ensure equal access for all individuals, including the Rights of Persons with Disabilities (RPWD) Act in India. Providing ramps in our college reflects the college's commitment to inclusivity, allowing all students to participate in academic and extracurricular activities without barriers. Ramps are an essential part of college infrastructure, promoting accessibility, safety, and convenience. Their presence ensures that every student and staff member, regardless of physical ability, can navigate the campus with ease.
